SUMMARY

Highly motivated Flutter Developer with hands-on experience in building cross-platform mobile applications using Flutter, Dart, and Firebase. Proficient in state management techniques like Provider, Riverpod, BLoC, and GetX. Adept at REST API integration, Firebase services (Authentication, Firestore, Realtime Database), and writing clean, maintainable UI code. Demonstrated ability to work collaboratively in Agile environments, debug effectively, and deliver scalable mobile solutions. Actively seeking a Junior Flutter Developer role to contribute to real-world projects and grow within a dynamic team.

TECHNICAL SKILLS

- Languages: Dart, HTML
- Frameworks & Tools: Flutter, Android Studio, VS Code
- State Management: Provider, Riverpod, BLoC, GetX
- Database & Backend: Firebase (Auth, Firestore, Realtime DB), Sqflite
- Architecture: MVC, MVVM
- Other Tools: REST API, JSON, Git, GitHub

EXPERIENCE

Flutter Developer Intern

Duration: 6 months

Luminar Technolab, Kochi

- Developed and deployed mobile apps using Flutter and Firebase.
- Integrated Firebase Auth and Firestore for user authentication and data storage.
- Applied Provider and Riverpod for state management.
- Consumed REST APIs and parsed JSON responses.
- Used Git/GitHub for collaborative version control.
- Participated in Agile stand-ups and sprint planning.

EDUCATION

Bachelor of Arts in English Literature ,University of Calicut

2021 – 2024

LANGUAGES

• English – Fluent

• Malayalam – Native

PROJECTS

DriveX – Car Rental App (Duration: 2 months)

- Developed a scalable car rental app using **Flutter**, **Firebase**, **BLoC**, and **Clean Architecture**.
- Integrated **OpenStreetMap** for location-based car discovery and real-time booking flow.
- Designed a smooth and intuitive UI for car listings, rental history, and payment screens.
- Used **Firebase Auth** for secure login and **Firestore** for dynamic car data management.
- Ensured clean code structure, separation of concerns, and reusable components for future scalability.

Trackizer – Monthly Expense Tracker App (Duration: 1.5 months)

- Built a personal finance management app using **Flutter** and **Dart** to help users track monthly expenses and budgets.
- Designed an intuitive UI using widgets like **ListView**, **Stack**, and **Card** for listing transactions and budget summaries.
- Implemented **real-time expense tracking**, **smart budgeting features**, and **category-based organization**.
- Integrated **interactive charts and graphs** for data visualization and financial insights using packages like `charts_flutter`.
- Focused on **data security** and privacy by adding basic encryption methods and secure local storage.
- Ensured **responsive design**, **clean UI**, and a beginner-friendly experience for all user types.

ForceFit – Full-Stack Fitness App (Duration: 1.5 months)

- Developed a clean, modern fitness app using **Flutter**, **Dart**, and **Firebase**.
- Integrated **user authentication**, **goal tracking**, and **cloud-based workout logs** using **Firestore**.
- Designed responsive UI with smooth navigation using **ListView**, **Stack**, and custom widgets.
- Implemented **state management** with **Provider** to ensure performance and UX.
- Focused on real-time interaction, mobile optimization, and user retention features
